Gartner Recognizes Expert System in its Insight Engines Magic Quadrant

The text analytics and cognitive computing leader recognized for its completeness of vision and ability to execute

Expert System (EXSY.MI) announced that it has been included by Gartner in the 2017 Insight Engines Magic Quadrant.

While enterprise search has represented over the past decade the dominant paradigm for how people find information, significant changes are under way at the intersection of the information retrieval and analytics markets, an area Gartner terms the "insight engine." Expert System has been positioned in this evolving landscape in the Gartner Magic Quadrant.

"We are pleased to have been included in the first edition of Gartner Insight Engines Magic Quadrant as providing actionable insight from information has always been a core competence of Expert System" said **Luca Scagliarini**, **Expert System CMO**. "We believe *this is also a significant acknowledgement of our consistent commitment in designing even more effective solutions to help our clients to improve their decision processes."*

Expert System's text analytics and cognitive computing products are designed to support organizations to create business value thanks to the Cogito platform's ability to read text, understand the meaning of words in context and learn – whether from experts or automatically from content - to extend its knowledge. At the core of every Cogito product is a comprehensive set of cognitive capabilities that help organizations to search, analyze and extract knowledge contained in large volumes of unstructured information to gain strategic insight.

Expert System created Cogito, a cognitive computing company that transforms the way organizations find, comprehend and use information. Cogito leverages proprietary artificial intelligence algorithms to deliver business value and ROI by extracting actionable knowledge from internal and external information and automating business processes. Cogito has been deployed to serve enterprises and government organizations in some of the world's largest industries (Banking and Insurance, Pharmaceuticals, Oil and Gas, Publishing and Government) including companies such as Shell, Chevron, Eli Lilly, Nalco Champion, Bloomberg BNA, Sanofi, Thomson Reuters, Wiley, Wolters Kluwer, the U.S. Department of Agriculture and the U.S. Department of Justice.
